0.6 THz
1.0 THz
extra delay of the slice (rad)
extra loss of the slice (dB)
extra loss of the slice (dB)
what the fits allow: extra delay (95 % lower bound to q = 1.18), extra loss up to a = 1 (H1)
time shift of the tissue term (0.061 ps)
heating, Liebe (0-80 K)
heating, Liebe x2.3 (0-20 K)
water gain into thickness (0-16 %)
same tissue thicker (0-16 %)
ions in tissue water (0-70 S/m)
axoplasm conduction (0-180 S/m)
node states, every extreme (80; 0.6 THz only)
