(a) geometry scaling (line: closed law)
full wave, E ∥
full wave, E ⊥
η at 1 THz
node length / myelin thickness
(b) all cases, 0.1–3 THz
η full wave
F quasi-static (Laplace)
(c) no internode dependence
P_node at 1 THz (aW per node, |E0| = 1 V/m)
internode length (μm)
E ∥
E ⊥
